The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year except as stated otherwise.

(B) **Use of Estimates**

The preparation of financial statements in conformity with Generally Accepted Accounting Principles require estimates and assumptions to be made that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities on the date of financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates and differences between actual results and estimates are recognized in the periods in which the results are known/ materialize.

(C) **Fixed Assets and Depreciation**

Fixed Assets are stated at their cost of acquisition or construction less accumulated depreciation and impairment losses. Cost comprises of all costs incurred to bring the assets to their location and working condition up to the date the assets are put to use.

Expenditure incurred during construction period: Apart from costs related directly to the construction of an asset, indirect expenses incurred up to the date of commencement of commercial production which are incidental and related to construction are capitalized as part of the construction cost. Income, if any, earned during the construction period is deducted from the indirect costs.

Depreciation on assets is provided, pro-rata for the period of use, by the Straight Line Method (SLM) as prescribed in Schedule II to the Act.

An asset is considered as impaired in accordance with Accounting Standard 28 on Impairment of Assets, when at balance sheet date there are indications of impairment and the carrying amount of the asset, or where applicable the cash generating unit to which the asset belongs, exceeds its recoverable amount (i.e. the higher of the asset's net selling price and value in use). The carrying amount is reduced to the recoverable amount and the reduction is recognized as an impairment loss in the profit and loss account.

(D) **Investments**

Investments are classified as current or long-term in accordance with Accounting Standard 13 on Accounting for Investments.

Current investments are stated at lower of cost and fair value. Any reduction in the carrying amount and any reversals of such reductions are charged or credited to the profit and loss account.

Long term investments are stated at cost. Provision is made to recognize a decline, other than temporary, in the value of such investments.

(E) **Revenue Recognition**

Revenue is recognized when it is earned and no significant uncertainty exists as to its realization or collection.

Other borrowing costs are expensed as incurred.

(H) **Foreign Currency Transactions**

Foreign currency transactions are recorded at the exchange rates prevailing on the date of the transaction. Monetary foreign currency assets and liabilities are translated into Rupees at the exchange rate prevailing at the balance sheet date. All exchange differences, are dealt with in the profit and loss account, except to the extent that they are regarded as an adjustment to interest costs are capitalized to fixed assets. Non-monetary items such as investments are carried at historical cost using the exchange rates on the date of the transaction.

(I) **Provision, Contingent Liabilities and Contingent Assets**

Contingent liabilities as defined in Accounting Standard 29 on Provisions, Contingent Liabilities and Contingent Assets are disclosed by way of notes to the accounts.

Current tax is measured at the amount expected to be paid/ recovered from the revenue authorities, using the applicable tax rates and laws.

The tax effect of the timing differences that result between taxable income and accounting income and are capable of reversal in one or more subsequent periods are recorded as a deferred tax asset or deferred tax liability. Deferred tax assets and liabilities are recognized for future tax consequences attributable to timing differences. They are measured using the substantively enacted tax rates and tax regulations. The carrying amount of deferred tax assets at each balance sheet date is reduced to the extent that it is no longer reasonably certain that sufficient future taxable income will be available against which the deferred tax asset can be realized.
