Projects and Capex update:

At the beginning of the year, the Company had commercially commissioned the three Blast Furnaces which were under shutdown for relining and modification/ capacity augmentation (one at each location viz. Vijayanagar, Dolvi and Salem works). Post commissioning, the company has been able to rapidly stabilize and ramp-up operations at the new facilities and achieved an overall capacity utilization rate of ~88% for the year, meeting its production guidance. Other ongoing projects are also progressing satisfactorily and are likely to complete as per schedule.

Key new projects:

The Union Cabinet has recently approved the National Steel Policy (NSP), 2017 which provides a long term vision to give thrust to the steel sector. It aims at enhancing domestic steel consumption, ensuring high quality steel production, and creating a technologically advanced and globally competitive steel industry. The government envisages domestic steel consumption to grow by 7% p.a. through 2030, and, consequently, India would require steelmaking capacity of 300 million tonnes by then vis-a-vis current capacity of ~ 128 million tonne.

In this context, the Board of the Company has approved the following key new investment projects to expand overall steelmaking capacity, lower operating costs and enrich product mix, along with a few other strategic projects with very low payback

period related to mining/environment/safety. These key projects will be set-up at a very competitive capital cost and will be returns accretive. Some of the Key Projects are:

- 1) Augmenting Crude Steel capacity at Dolvi works to 10 MTPA: The steelmaking capacity at Dolvi Works will be increased from existing 5 MTPA to 10 MTPA. The major facilities included in the project are a 4.5 MTPA Blast furnace with 5 MTPA Steel Melt Shop, 5 MTPA Hot Strip Mill, 5.75 MTPA Sinter plant, 4 MTPA Pellet plant, and 4 Kilns of 600 TPD LCPs. The company has already acquired the land and necessary statutory approvals in place. The estimated project cost is ₹15,000 cores and the project is expected to be completed by March 2020.
- 2) Revamp and capacity Up-gradation of BF-3 at Vijayanagar Works from 3.0 MTPA to 4.5 MTPA: BF-3 at Vijayanagar works is to be revamped and upgraded from 3 MTPA to 4.5 MTPA, along with the associated auxiliary units. Post completion of this project, the existing high cost operations at BF-2 will be shut down, so that overall Vijayanagar works capacity remains at 12 MTPA. This will help to lower the operating costs. The estimated project cost is ₹1,000 cores and the project expected to be commissioned in a period of 20 months.
- 3) Capacity expansion of CRM-1 complex at Vijayanagar Works as well as modernization-cum-capacity enhancement at downstream facilities of JSW Steel Coated Products Limited: The company continues to remain focused towards enriching the product mix, and, looking at the growing demand for construction as well as appliance grade products, the following projects are being undertaken:
 - a) Increase capacity of CRM-1 complex at Vijayanagar from 0.85 MTPA to 1.80 MTPA along with two Continuous Galvanizing Line of 0.45 MTPA each, a new 1.2 MTPA Continuous Pickling Line for HRPO products, and a new 0.80 MTPA HR Skin Pass Mill for HR Black & HRSPO products. The estimated project cost is ₹2,000 cores and the project is expected to be completed by September 2019.
 - b) Modernisation and capacity enhancement of Vasind and Tarapur downstream facilities. The modernisation cum capacity enhancement project includes: i) increase in net cold rolling capacity by 0.96 MTPA by replacing existing 6 CR mills with 2 Batch Tandem CR mills one each at Vasind and Tarapur, ii) increase in GI/GL capacity by 0.63 MTPA, and iii) increase in colour coating capacity by 0.08 MTPA. The project cost is estimated at ₹1,200 cores and the project is expected to be completed by April 2019.

The total outflow on account of equity dividend including corporate tax on dividend will be ₹654.6 crores, vis-a-vis ₹218.2 crores paid for FY16.

Volume Guidance:

The Production and Sales guidance for FY 2017-18 is given below:

Particulars	FY'17 (Actual)	FY'18 (Estimated)	Growth (YoY)
Crude Steel Production (million tonnes)	15.80	16.50	4.4%
Saleable Steel Sales (million tonnes)	14.77	15.50	4.9%

Outlook:

Global growth outlook is constructive with improving momentum in both advanced as well as key emerging market economies. The US economic growth outlook is robust despite a weak 1QCY2017. The Euro area continues to see moderate growth supported by expansionary monetary policy, rising exports and stable consumer spending. Japan is also seeing better activity levels driven by export growth, policy support and improved corporate profits. China, despite the risks related to rapid expansion of credit and its dependence on policy stimulus measures, is expected to achieve a managed deceleration of growth within targeted levels. The International Monetary Fund (IMF) has revised up its projections for CY2017 World Economic Growth to 3.5% compared to 3.1% growth in CY2016.

The World Steel Association (WSA) forecasts that global finished steel demand will grow by ~20 million tonnes in CY2017 primarily driven by growth in India and ASEAN-5, whereas Chinese steel demand is expected to remain flattish. However, 1QCY2017 crude steel production is already up by ~22 million tonnes on YoY basis with improved capacity utilization in most of the regions – with China reporting an increase in steel production by 8.8 million tonnes in this period. Steel exports from Japan and Korea continue to remain at elevated levels with pricing at a discount to their domestic market prices. Chinese steel exports are lower amidst increasing trade remedial measures by importing countries, as well as a pick-up in its real estate sector and sharp re-stocking demand in the country before the Lunar New Year holidays. In this environment, global steel trade will continue to be driven by increasing trade remedial measures.

In the absence of further supply-demand disruption, raw material prices are easing off and volatility is receding. However, coking coal contract prices for 2QCY2017 is expected to settle at a price higher than the current spot and this is expected to keep steel prices range-bound.

In India, crude steel production increased by 8.5%YoY whereas apparent finished steel consumption grew by 2.6%YoY in FY2017, as second-half demand was impacted by poor liquidity post de-monetization. At the same time, steel imports remained at ~ 8 million tonnes on annualized basis despite various trade remedial measures. There appears to be some amount of circumvention, which, in turn calls for stringent monitoring mechanism.

In India, overall consumer discretionary spending, public capex on 'Rurban' infrastructure development and foreign direct investment have continued to improve, supporting a gradual growth recovery. Steel demand is expected to benefit from rising infrastructure spend and improving consumer demand in FY2018. The allocation for infrastructure development at Rs.4 trillion in the Union Budget with thrust on affordable

housing, water and gas pipelines, renewable energy and road sector, and expected recovery in rural demand on the back normal monsoon expectations augurs well for steel consumption growth in the country. We expect Indian steel demand to grow by \sim 4 million tonnes i.e. \sim 5% in FY2018.

JSW Steel is a part of the diversified JSW Group, which has presence in Steel, Energy, Infrastructure, Cement and JSW Ventures. JSW Steel is the leading integrated steel company in India with an installed steel-making capacity of 18 MTPA. JSW Steel's plant at Vijayanagar is one of the largest single location steel producing facilities in the country with a capacity of 12 MTPA. JSW Steel has a strong product assortment covering the entire gamut of flat and long steel products manufactured through technology in the form of Corex and Blast furnaces.
