Perseverance

Embracing a Greener Future

Our business strategies are well aligned with our ambition of being at the forefront of energy transition, and our goal of growing our renewable energy footprint while ensuring sustainable value creation. Our six focussed strategies allow us to optimally seize opportunities arising from the energy transition and position us well for long-term sustainable growth.

Our Strategic Priority

Our target is to become a leading provider of sustainable energy. With the energy sector undergoing a significant transformation, we are driving the transition towards clean energy, thereby enhancing stakeholder value and creating a sustainable future for future generations.

We are working on implementing a cleaner fuel mix by vastly scaling up our portfolio of greenfield renewable assets, primarily across wind and solar. We are also reducing specific fuel consumption for the existing thermal plants. Our transformation is well supported by a strong balance sheet and project execution expertise.

4.6 GW

Total Operational Portfolio

2.4 GW

Under-construction Renewable Portfolio

Progress in FY22

We have set a vision of becoming a 10 GW energy company by FY25, and a 20 GW company by FY30. This ambitious plan reinforces our position as a leader in the energy transition with our renewable portfolio share growing from 55% currently to 70% by FY25 and to 85% by FY30. All the incremental capacity additions will be made through renewable energy sources. Currently our installed renewable portfolio stands at 1.4 GW (Hydro: 1,391 MW, Solar: 10 MW) while the under-construction portfolio stands at 2.4 GW.
